

The pro-set format

- Each of the three pairs in a team plays one pro-set to 8 games (with a 7-point tie-break at 7-7) against each of the three pairs in the opposing team.
- A match would therefore consist of a total of 9 pro-sets.
- One point would be awarded for each set won
- The winning team would earn a further 2 points
- Where a team concedes a match, they will be penalised eleven points and the opposition will be awarded eleven points
- Starrings stay as current Notts Summer League
- A team with only two pairs can play the match but they can't win the match. They can score a maximum of 4 points.
